

# WEATHER RISK MANAGEMENT

Weather Resource Protection

**LOW WIND? COVERED.**

Cash Flow Management for the Energy Industry

# MANAGING RISK IS AN ART FORM

Low wind and wind intermittency are fundamental risks within wind generation which can be managed using Allianz products.

Allianz is able to protect against wind generation potential falling below expectations.

- Our products can manage short and long term risks at a single location or over a portfolio of assets.
- We cover everything from extreme scenarios for project finance security through to utility scale onshore and offshore production smoothing for existing and planned operations.
- To protect against construction delays, we cover excess wind risks.

## TAILORED STRATEGIES

As part of the largest insurance group in the world, Allianz Risk Transfer is your partner for weather risk management.

- Global reach with local presence.
- Excellent credit with an AA- rating.
- Ability to operate in most jurisdictions worldwide.

# WHY MANAGE WIND RISK?

- Better cash flow stability
- Improved returns
